Copy Protection

Empire Soccer, Championship Manager and Sensible Soccer require you to enter codes from copy protection grids in order to play the game. These grids have been reproduced in this technical guide for your convenience. Please use these grids only and not the pages from the User Guide as may be requested by the software.

Before You Start!

Thank you for purchasing SOCCER '4-In-One' and your support for Empire Interactive. We hope you enjoy the titles we have included in the pack.

Please be sure to register your purchase with us within fourteen days. For more registration information please refer to the enclosed registration card.

In this pack you will find the components listed below. Any reference to other components throughout the User Guide should be ignored.

- 1 x SOCCER '4-In-One' User Guide
- 1 x Technical Supplement
- 1 x Registration/Warranty Card
- 1 x IBM/Compatible CD-ROM

The following sections assume that you are using MS-DOS Version 5.0 (or higher), your hard disk is C:, your CD-ROM drive is D: and that you are installing to the default directory SOCCER. Please be sure to substitute these references correctly throughout this supplement.

In order to use the games, they must be installed to your hard disk. Please follow the procedure below.

Installation & Running

Ensure you are at the DOS prompt and not within Windows or any other environment manager. Simply type INSTALL <Return> at the CD-ROM prompt and follow the on-screen instructions. After a successful installation, you will be shown how to run the games from a hard disk MENU program. Please be sure to read the following **Important Notes** section before attempting to run the games. If you have problems with the installation please refer to the Trouble-Shooting section of this guide.

Important Notes

Copy Protection - Please refer to protection grids located within this technical guide.

Championship Manager - It is essential to use a MicroSoft Compatible mouse driver to make selections within the game.

Empire Soccer - Some machine configurations have highlighted a problem with the Sound Selection screen. If the program appears to hang with a blank black screen, try making one of the following key selections specific to your system:

PC Speaker - 1

SoundBlaster - 2

Roland - 3

Adlib - 4

Striker - Further notes are available by typing READ <Return> within the STRIKER directory on the CD-ROM.

Sensible Soccer - After selecting to play Sensible Soccer from the Empire main menu, it will not be necessary to select INSTALL from the Sensible Soccer menu. Simply select CONFIGURE, SAVE and EXIT to adjust settings for your system.

Additional Key Controls for Sensible Soccer -

- Q - Brings on manager's bench for team playing up the pitch.
- A - Brings on manager's bench for team playing down the pitch.
(Only accessible when ball is out of play).
- P - Pause On/Off
- R - replays last few seconds of action.
- S - Records last few seconds of action to be played back later. Only available if machine has Free Extended memory that is being accessed by HIMEM.SYS
- F10 - Toggles crowd chants On/Off. Only available with SoundBlaster Sound FX option.
- H - replays all game highlights in sequence. Can only be activated if Extended Memory is free and full time score is displayed.

Quitting to DOS -

Empire Soccer -

Championship Manager -

Sensible Soccer -

Striker -

'Quit-to-DOS' menu option.

-Save Game and Select Quit Icon.

Press Control F1 during menu.

Press ESC.

Trouble-Shooting

Installation Problems

Installation of all four games requires 5,146,662 bytes (approx. 5Mb) of hard disk space. You can find out if your machine has this available by typing DIR <Return> at the hard disk prompt. If this amount is not available, try installing to another resident hard disk or partition. Alternatively try freeing up some space by deleting old files which are no longer of any use. Please also remember, it is not necessary to install all four titles at once.

On rare occasions, installation problems can arise when the target drive is badly fragmented. With MS-DOS version 6.0 and above, you are able to use the DEFRAG program from the DOS prompt. For more help with DEFRAG type HELP DEFRAG <Return>.

Memory Related Problems

The games included in SOCCER '4-In-One' each have a different FREE 'Conventional Memory' requirement. To find out how much free conventional memory your machine has, simply type MEM <Return>. You should ideally have 580k free (that is 593,920 bytes free). If you do not have this amount free or if you think that you may have a memory related problem, Empire Interactive Technical Support can help. Before contacting us however, it is essential that you have either a hard copy or note of the contents of your AUTOEXEC.BAT and CONFIG.SYS files (these files are located at the root of your hard disk and can be printed using the EDIT program), together with a hard copy or note of your machines memory status, (after typing MEM <Return>). Please see Customer Service Information below.

Customer Service Information

If you would like help with SOCCER '4-In-One' or any other Empire Interactive titles, please feel free to contact our customer services department on:
